

# FIXEL DETAILIZER PS

Version 2.5.x

Fixel Detailizer 2 PS is a Multi-Scale Details Enhancer. [www.fixel.com](http://www.fixel.com)

Detailizer features 5 different **Details Scales**, to completely control the contrast level of each detail scale level. Detailizer benefits from innovative Wavelets based algorithm to decompose the image into frequencies. Using Detailizer, controlling the details contrast level at each scale is just like using Hi Fi Equalizer.

Fixel Detailizer is compatible with computers with SSE4 and up.

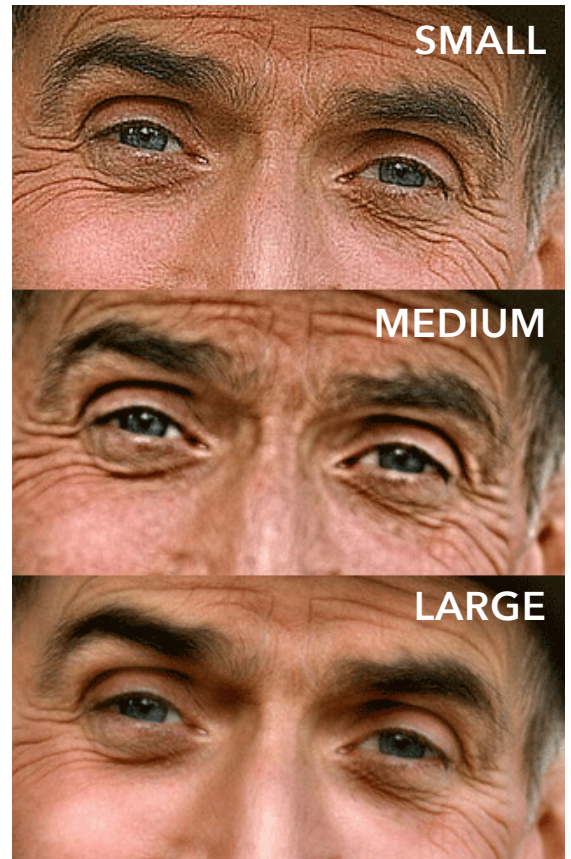

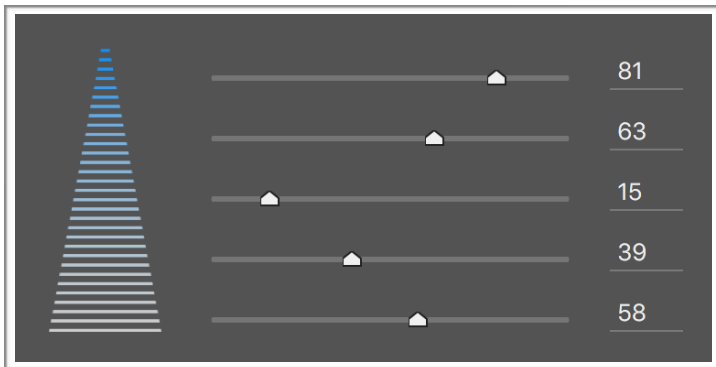

- ▶ Novel Algorithm
- ▶ 32bit color depth internal processing
- ▶ 64bit compatible
- ▶ Multi-CPU accelerated
- ▶ Modern CPU Optimized code
- ▶ Adobe Photoshop CS6 to CC2015.5
- ▶ Recordable in Actions for Automation

# Scales explained

The 5 Scales control the detail sizes:

- ▶ Top sliders: **small/fine detail**
- ▶ Middle slider: **medium size detail**
- ▶ Bottom sliders: **large/coarse detail**

The higher the numbers, the stronger the effect.
